

ALIVE CASINO

The Alive Casino is the world's first cryptocurrency casino to offer a virtual reality gambling experience.

The Alive Casino is the world's first online gambling platform combining two of the fastest growing technological advancements of our time – Blockchain and Virtual Reality.

The Alive Casino will give the opportunity to visit a land-based casino without leaving one's home. Once the VR Casino is set and launched, the player gets a 360-degree view of fully interactive slots, live dealer tables, sports-betting bar and competitive skill games. In addition to the VR Casino, the platform will also offer all types of traditional games, including sports-betting with over 55.000 pre-match events monthly.

KEY FUNCTIONS

Payment

Alive token holders will be able to deposit tokens along with other cryptocurrency and fiat in order to begin playing during the early stages of the platform. Alive Tokens will later be useful to access exclusive token holders only features such as early-release games and special events

Profit

Among the tokens out there, Alive (AL) tokens may just be the most profitable. Every 3 months, 40% of alive casino's profit will be distributed among token holders who have their tokens stored in the Alive's Hold wallet.

Payment in other cryptocurrencies

Since payments in several cryptocurrencies to the platform will be accepted, profit distribution will be carried out in each of those currencies, in a proportionate manner. BTC, ETH, USDT and AL tokens will be distributed quarterly to token Holders.

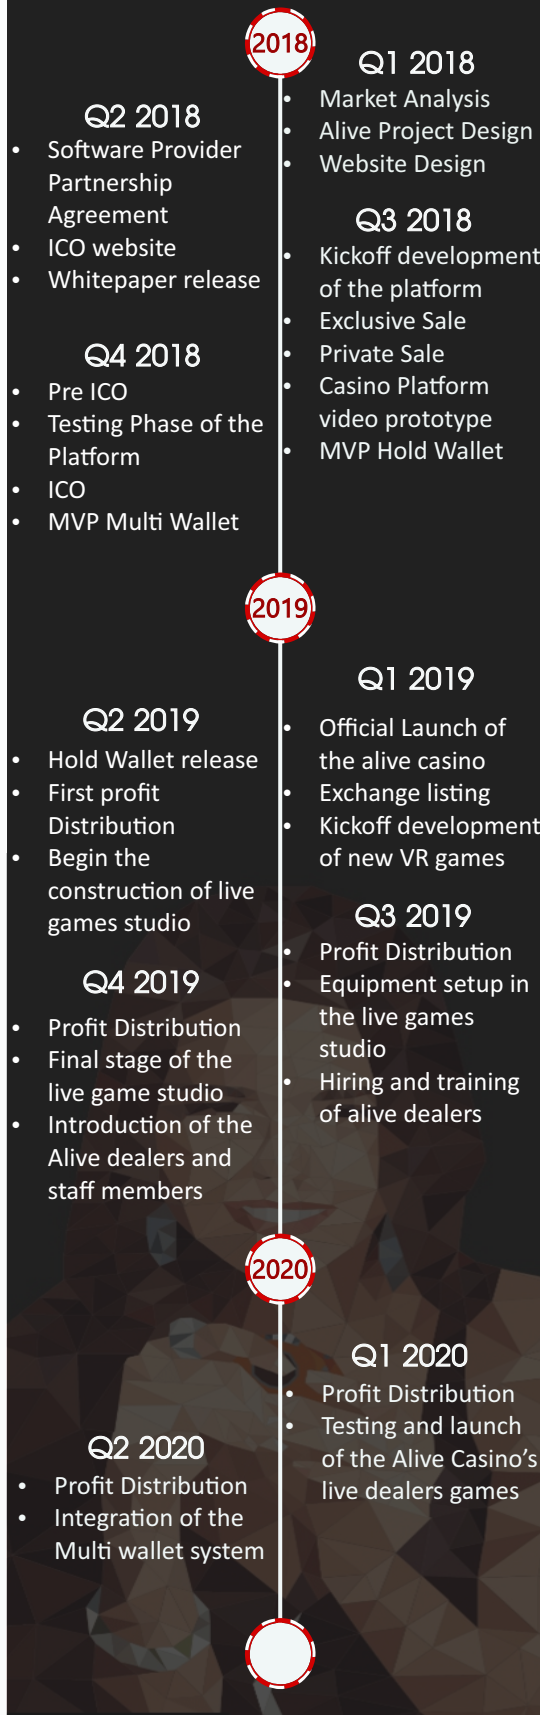

A high demand asset

The Alive token will always have high demand on exchanges. As a rule, every three months, Alive's in-house token engineers will burn 5% of all AL tokens the house earns each quarter, reducing the token supply. Also, to create higher volume and token demand, newly developed virtual reality games will be only accessible with Alive Tokens.

TOKEN DETAILS

SYMBOL	AL
SOFT CAP	\$2 MILLION
GOAL CAP	\$10 MILLION
HARD CAP	\$30 MILLION
TOTAL SUPPLY	1,000,000,000 AL
CURRENT TOKEN PRICE	\$0.015
